

IMPLEMENTING A UNIFIED AND IDMP COMPLIANT RIMS

For a Top 10 Pharma Generics company

HIGHLIGHTS

- Seamless migration to a fully IDMP-compliant cloud solution
- Overcoming legacy data challenges spanning 20+ years
- Smooth go-live with minimal disruptions and post-launch corrections

APPROACH

The approach focused on a collaborative and structured process to ensure successful delivery of the project:

- **Collaborative Requirement Gathering:** Engaging with user groups to collect detailed input for the Request for Proposal (RFP), ensuring the solution met all business needs.
- **Streamlined Tender and Selection Process:** Managing the tender process, providing insights for software selection, and ensuring the chosen solution aligned with the client's goals.
- **Cross-functional Coordination:** Overseeing the integration of multiple workstreams—RIMS configuration, data migration, and validation—into a unified, manageable plan.
- **Ongoing Support and Accountability:** Taking responsibility for the RIMS workstream, ensuring timely delivery and resolving challenges around data migration and validation to meet project deadlines.

BACKGROUND

This **top 10 Pharma Generics company** relied on three separate, on-premise systems for RIMS, sDMS, and Publishing, with RIMS and sDMS at end-of-life and losing vendor support. To future-proof operations, the client aimed to transition to a unified, cloud-based RIMS and sDMS solution with IDMP compliance. Key challenges included migrating to an IDMP-compliant model and addressing data quality issues from past migrations and evolving regulations.

OBJECTIVES

The objective of the project was to replace the client's outdated, on-premise RIMS and sDMS systems with a unified, cloud-based solution that meets IDMP compliance standards.

Key objectives:

- Implement a future-proof, cloud-based RIMS and sDMS solution.
- Achieve full IDMP compliance for regulatory data.
- Integrate and upgrade the Publishing system.
- Streamline configuration, data migration, and validation into a unified project plan.

RESULTS

The project successfully met objectives, resulting in significant improvements to the client's regulatory systems and processes:

- **Seamless Transition:** The new RIMS and sDMS solution went live smoothly, requiring minimal corrections post-launch.
- **IDMP Compliance:** Full compliance with IDMP standards was achieved, ensuring regulatory readiness.
- **Comprehensive Training:** Detailed training materials and work instructions supported an effective change management process.
- **Stabilized Hypercare Period:** A brief hypercare period with only minor adjustments helped ensure long-term system stability and user confidence.
